

Financial Analyst Portfolio

- Executive Financial & Performance Review
- Prepared for Leadership Decision-Making
- Jamie Christian

Executive Summary

- • Demonstrates FP&A, financial modeling, and strategic finance capability
- • Supports executive decision-making through structured financial analysis
- • Built using Excel models, SQL, Python, and BI dashboards

Scope of Financial Analysis

- • Revenue & expense trend analysis
- • Budget vs Actual variance analysis
- • Profitability and margin analysis
- • Scenario and sensitivity modeling
- • ROI and capital allocation evaluation

Key Financial Highlights

- • Revenue Growth: 14.8% YoY
- • Gross Margin: 62.4%
- • Operating Margin: 28.1%
- • LTV:CAC Ratio: 5.6x
- • Strong unit economics and cost discipline

Financial Insights

- • Margin expansion driven by operational efficiency
- • Variance analysis revealed controllable cost drivers
- • High-ROI segments outperforming forecast assumptions
- • Forecast accuracy improved using rolling models

Risks & Considerations

- • Margin compression risk if cost growth exceeds revenue growth
- • Forecast sensitivity to pricing and demand assumptions
- • Revenue concentration risk in top segments
- • Need for continued cost governance

Strategic Recommendations

- • Reallocate investment toward highest-margin segments
- • Strengthen expense management discipline
- • Implement rolling forecasts quarterly
- • Continue monitoring unit economics and ROI metrics

Analyst Value Demonstrated

- • Executive-level communication
- • Financial storytelling with data
- • Structured problem solving
- • Business partnering mindset
- • Decision support aligned to leadership needs
